

ZOYA KHAN

Toronto, ON | 905-462-6928 | zoyak.khan@mail.utoronto.ca | in/zoya-k

EDUCATION

University of Toronto - BASc, Mechanical Engineering, *Minor: Business, Streams: Energy/Environment, Manufacturing* 2022 – 2027

- **Dean's Honour List (2x) | \$50K in Merit Scholarships:** UofT Scholar, Dean's Merit, Scrymgeour Engineering Entrepreneurship

WORK EXPERIENCE

CIBC, Process Engineering Analyst - Real Estate Secured Lending Toronto, ON | May 2025 – Present

- Redesigned the exception workflow by working with Product to define requirements and scope, developing current/future process maps, failure mode analyses, gap analyses, and HTML prototypes/Figma mockups for functional interfaces, generating \$653K/year
- Analyzed 10K+ system fields using Power Query, identifying ~70% field misalignment and a 15% field reduction opportunity
- Redesigned routing logic from operator job shadow insights, eliminating duplicate reviews and generating \$2.63M annually
- Built Python scripts to analyze 6K+ deals and extract credit risk deals, developed a Foreign Income indicator to mitigate policy gaps
- Led a system integration initiative for a platform used by 400+ CIBC users, collected user feedback through Power Automate workflows, analyzed data by prioritizing high impact pain points, defined the future functionality, workflow and requirements

BMO, Data Analyst - Customer Insights & Reporting Toronto, ON | May – Aug. 2024

- Developed SAS PROC SQL queries across 20+ databases to analyze 170+ banking KPIs, identifying trends and relationships across revenue per product, balances, income, customer attributes, delinquency, credit score, and charge-off trends
- Utilized SAS macro variables and Advanced Query Tool to streamline reporting and improve accuracy across customer segments
- Built Excel-based analytical models using customer snapshots, 2-year trends, and aggregated datasets
- Led partner meetings to gather requirements and presented insights through data storytelling to support strategic initiatives

Mother Parkers Tea & Coffee, Engineering Intern - Continuous Improvement Mississauga, ON | May – Aug. 2023

- Developed and maintained Power BI dashboards to track and optimize Overall Equipment Efficiency (OEE) for 100+ machine lines
- Analyzed data to identify bottlenecks using Six Sigma methodology (process maps, flowcharts); led to annual savings of \$90K+
- Created an Excel model using pivot tables and charts to calculate machine runtime based on input OEE percentages
- Led meetings with Subject Matter Experts to develop detailed SOPs on machine processes, enhanced operational efficiency by 60%

EXTRA-CURRICULARS

Vice-President, Finance & Events - UofT Engineering Consulting Association (UTESCA) Sep. 2024 – Apr. 2026

- Managed finances and ended year within 5% of projections; secured all funding and coordinated vendors for 200+ student events
- Executed 6 impactful workshops and case competitions, securing partnerships and sponsorships with the Big 4 Consulting Firms
- Led 10 directors, sustaining 85%+ meeting attendance and earning a 95% leadership rating from directors based on feedback forms

Director, Finance & Mentorship - UofT Women in Science & Engineering (WISE) Jun. 2024 – Apr. 2026

- Secured \$75K in sponsorships for the National Conference (500+ delegates) through targeted corporate outreach and sponsor calls
- Led WISE's Mentorship Program, pairing 80+ high school students with UofT STEM mentors for academic and career guidance

Associate, Professional Development - UofT Consulting Association (UTCA) Jun. 2025 – Apr. 2026

- Created and led case prep workshops on Profitability, Market Entry and M&A for 50+ students for the UTCA Case Camp

PROJECTS

Technical Project Lead, Waste Classification Deep Learning Jun. – Aug. 2024

- Coded a CNN in PyTorch and Python to classify 15K+ images across 12 categories, tuning model to achieve 90% accuracy

Product Manager, Smart Helmet for Blind Climbers | Stakeholder: BaseCamp Climbing Jan. – Apr. 2023

- Developed an Arduino-based helmet prototype using IR sensors to detect coloured climbing holds and trigger audio guidance alerts
- Collaborated with BaseCamp Climbing to gather user needs, define product requirements and design for accessibility and usability

Software Personal Projects, Python & C Aug. 2022 – Apr. 2023

- Data Structures & Algorithms in C: Built a seam-carving image resizer using dual-gradient energy and dynamic programming; developed an autocomplete engine returning weighted top matches using memory allocation, qsort, and binary search
- Python: Built a Gomoku AI for strategic move selection; developed a credit card simulator that tracks purchases, interest and fraud

SKILLS, CERTIFICATIONS & AWARDS

- **Analytic/Data Skills:** Excel, VBA, Power BI, Python, SQL, SAS, R, Minitab, MATLAB, Power Query, Power Automate, FactSet
- **Software/AI Skills:** C, JavaScript, HTML, GitHub, APIs, Pandas, NumPy, Jupyter Notebook, AI Fluency (Cursor/Claude)
- **Certifications:** PL-900: Microsoft Power Platform (June 2026), AI for Product Owners (June 2026), Lean Six Sigma Yellow Belt (June 2025), Certificate of Bilingual Studies: French (June 2022) | **Tools:** Jira, Confluence, Agile, Figma, Visio, PowerPoint
- **Awards:** 2nd Place AI & Tech Spark Hackathon, CIBC (Apr. 2026) | 1st Place Ace the Case, Deloitte x UofT (Jan. 2026) | 2nd Place Sardo Foods Case, UofT (Sep. 2023) | 3rd Place Space Rover RSX Hackathon, UofT (Mar. 2023)
